

How to visit an experience in the Over the Reality metaverse?

Step 1

Download the OVER application from your mobile at the following links:

-<https://apps.apple.com/us/app/ovr-over-the-reality/id1463400310?ls=1>

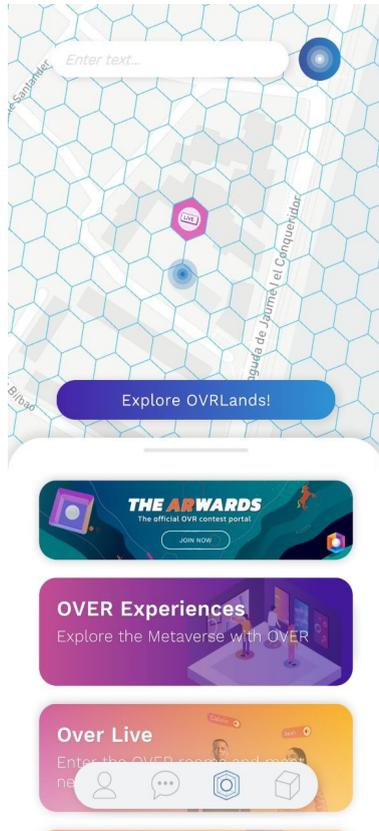

-<https://play.google.com/store/apps/details?id=com.gezapp.ovr>

Step 2

The simplest thing is to register with your google email, but you can also create a username and password to access the application. Create an account or sign in with your google or facebook social account.

Step 3

Once you have entered the Over application, by default you are on the page where the map is displayed. You will see that there are some hexagons where it says LIVE and they are pink. This means that there is an augmented reality experience in that hexagon.

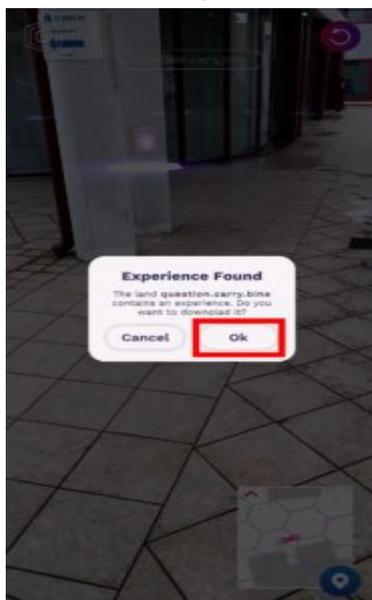

Step 4

Press the blue Explore OVRlands button and walk to the hex you want to visit. You have a minimap at the bottom right in case you need to be guided, you can enlarge or reduce it with the red arrow.

The application will automatically detect the experience and ask you if you want to download it. Tap Ok.

An orange confirmation point appears. Aim towards the ground and confirm the point by clicking with your finger to see the experience.

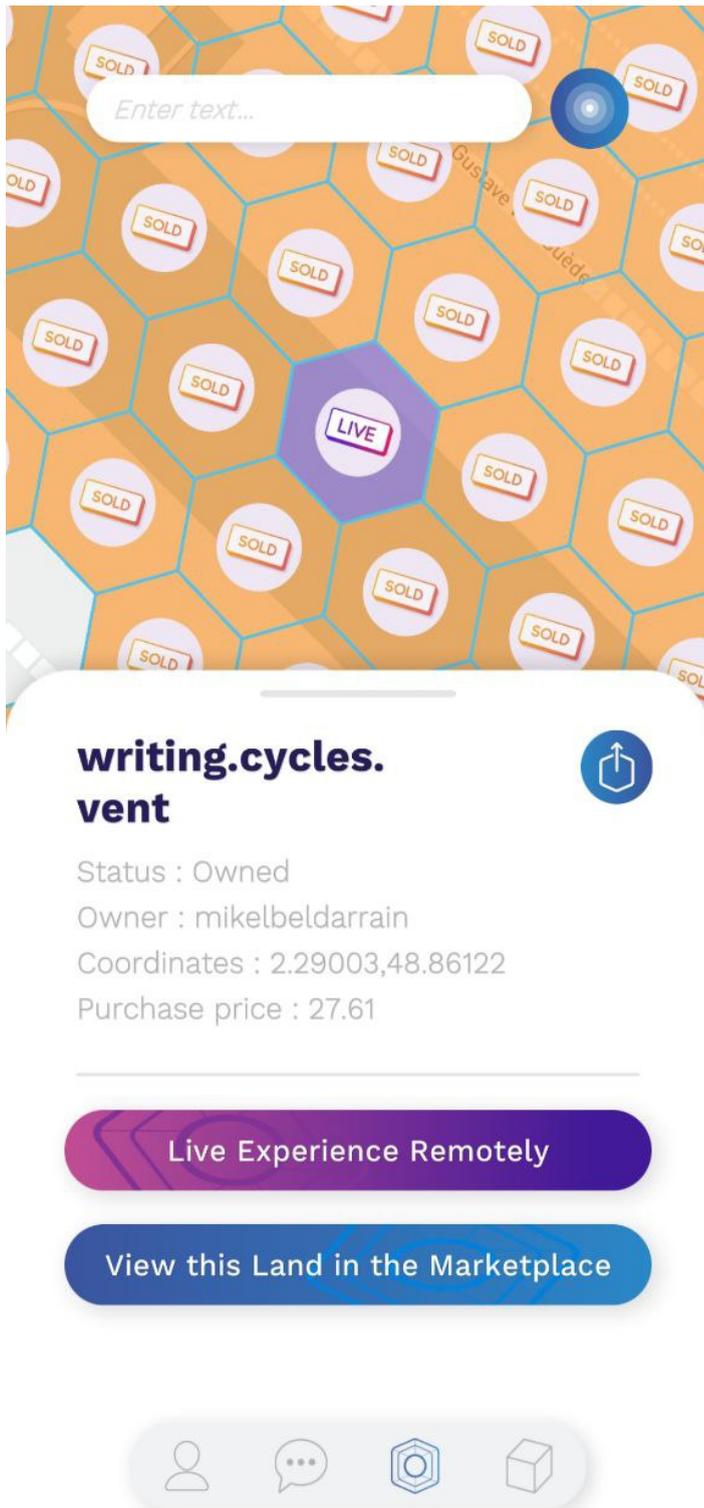

You're done.

Walk and see the exhibition in augmented reality with your mobile device. You can click on some works to visit the artist's profile.

I can't visit Madrid to see this event, can I see the exhibition from the Over app?

Yes, you can visit the exhibition from anywhere in the world with your mobile device.

To do this, download the Over application in playstore and create your account
Each hexagon is named with 3 random words separated by dots.

In the search engine above where it says enter text... write the name of the hexagon and press ok or type the direction on the map you want to go to to find the hexagons that have content.

Name of the exhibition hexagons

Hexagon 1 Kazaa.fire.architectures
Hexagon 2 Kazaa.fire.teresa

The app immediately takes you to the hexagon. At the bottom you will see a button that says LIVE EXPERIENCE REMOTELY.

Press this button, aim at the ground and confirm the drop point.

You're done.

The application will download the experience and you can view it with your mobile device. It is recommended to be in an open and safe space for a unique experience in the Over the Reality metaverse.
